

HYDRAULIC CYLINDER FOR 7 MPa (HC) $\phi 125$ to $\phi 160$

Features

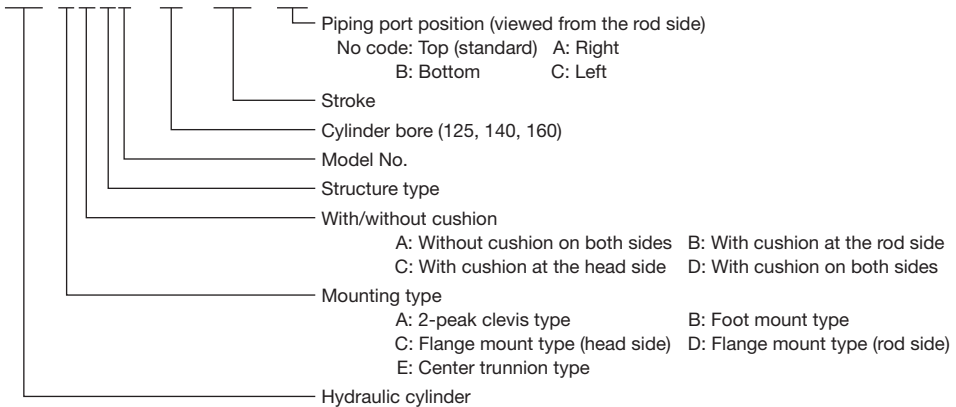

1. The cylinder is highly wear resistant since the cylinder tube internal face is finished by precision honing and the piston rod is coated by hard chromium plating.
2. The packing is selected very carefully; packing with a long service life is used.
3. Five types of mounting (clevis type, foot mount type, head side flange mount type, rod side flange mount type and center trunnion type) are available and the type most suitable for the application can be selected.
